Re: Request for Waiver of Acconeer AB Request for Waiver of Section 15.255
ET Docket No. 21-48

Dear Ms. Dortch,

NEXTY Electronics supports the request for waiver filed by Acconeer requesting that the Commission allow marketing of its radar system in the United States under the conditions stated in the waiver request.

NEXTY Electronics is a group company of Toyota Tsusho Corporation and an electronic components distributor for mainly automotive industry. Headquartered in Japan, NEXTY Electronics supplies components to automotive manufacturers worldwide.

Acconeer seeks a waiver of the Commission's rules for vehicle radar operating in the 57-64 GHz band. This waiver would allow Acconeer's radar to perform vital sensing activities within and directly outside of vehicles, enabling OEMs to offer their customers child safety detection, seat belt detection, vehicle access technologies. We believe that Acconeer's waiver will provide for important safety benefits, including lifesaving benefits of detection of children left in carseats.

NEXTY has evaluated Acconeer sensor and the Acconeer 60 GHz radar system provides the best solution, providing high accuracy rates, low power consumption in a small form factor.

We respectfully request that the Commission approve Acconeer's waiver request.

Respectfully submitted,

Kyoichi Yamamoto
Team Leader
